INTENSIVE CARE TRIALS IN MELBOURNE

ABOUT US

Scale your trial across six world class research sites and reach diverse patient populations across Melbourne. Our experienced investigators and dedicated trial teams drive rapid start up, strong recruitment and reliable data collection.

- ✓ 6 sites
- ✓ 10 FTE dedicated research nurses
- ✓ More than 120 ICU beds providing advanced life support
- ✓ More than 10,500 patients admitted each year

Austin Health

Serving Melbourne's north-east, Austin Health delivers robust trial infrastructure, including -80°C storage, refrigerated centrifuging and 24/7 pathology and pharmacy services.

Royal Melbourne Hospital

One of Victoria's two major trauma centres, the Royal Melbourne Hospital supports a catchment of approximately 6 million Victorians with 24/7 pathology support and specialist trial infrastructure.

Footscray Hospital

Opened in 2026, the new Footscray Hospital continues Western Health's service to Melbourne's west, providing modern clinical trial facilities, ultralow temperature storage and dedicated CRA monitoring space.

St Vincent's Hospital Melbourne

St Vincent's Hospital Melbourne delivers robust clinical trial infrastructure, including -80°C freezer storage, refrigerated investigational product facilities, 24/7 pathology services and dedicated clinical trials pharmacy access.

Northern Health

Serving one of Australia's fastest-growing communities, Northern Health supports a culturally diverse population from 185+ birth countries and offers -80°C and -20°C storage and sample processing.

Sunshine Hospital

A leading teaching hospital within Western Health, Sunshine Hospital offers dedicated research facilities including refrigerated centrifuges, -20°C and -70°C freezers, and secure trial storage.
